

ExteriorShield Protection - A water-based polymer coating applied to all the exterior surfaces. It offers a protective, glossy anti-static layer on the vehicle's finish with a very strong cross-linked covalent bond just like super glue.

Exterior Pro Shield has a high resistance to high temperatures to both harsh and corrosive environments.

- Bird Droppings
- Tree Sap
- Hard Water Etching
- Oxidation
- Acid Rain
- Insects

Customers value their time and money

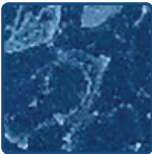

- Cleaning time is greatly reduced in treated areas
- Significantly reduces cleaning costs and proven to reduce washes
- Higher Resale value

Providing innovative products

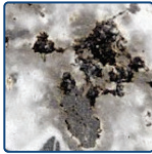

- ExteriorShield is sustainable for five years, no reapplication required
- Provides paint flexibility and durability
- Repels dust, dirt and pollen on treated surfaces
- Heat tested to over 500 degrees

Our products are completely safe for children, adults and pets. It does not wear off the surface, made with Hyper Green technology and is water based.

ExteriorShield can be applied using spray bottle or with a wet-spray fogger.
